

How To Assemble THE PIXAPRO 100X200CM Professional Heavy Duty 5-in-1 Reflector Panel

How To Assemble THE PIXAPRO 100X200CM Professional Heavy Duty 5-in-1 Reflector Panel

List of Included Parts

How To Assemble THE PIXAPRO 100X200CM Professional Heavy Duty 5-in-1 Reflector Panel

1. Add 1x Clamp (E) To Each of the (A) and (B) Bars. Do Not Fully Tighten them as yet, as you will need to attach the handle bars later.

2. Connect A and B Bars together and then connect a C Bar to each end to form the basic shape of the frame.

4. Once you have done all of that, you should have something that looks like this. If the reflector is going to be held up by somebody, then all you need to do then is find the fabric that you require and stretch it over the frame. Secure the material using the Velcro tabs stitched into the fabric.

5. To attach the stand, first attach the Grip Head (F) to the upper most handle bar (D) as demonstrated in the photo above.

6. Then insert the stud at the top of the Stand (G) into the Grip Head (F), and tighten the Wing Screw until the stand is held securely.

7. The Completed Frame Should look something like this.
